

How to Create an Account at WordPress

Summer 2016

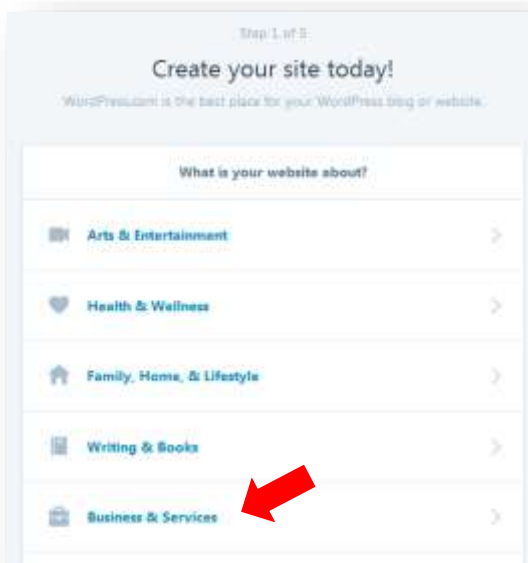

[You only need to do this once]

In your web browser [Firefox] go to: www.wordpress.com

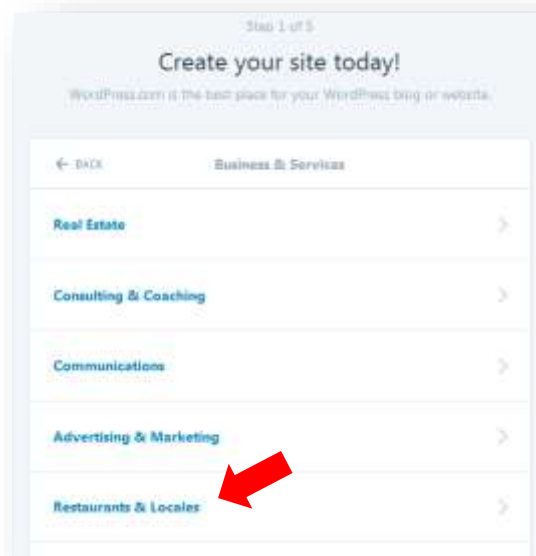

Click the button: **Create Website** or **Get Started**

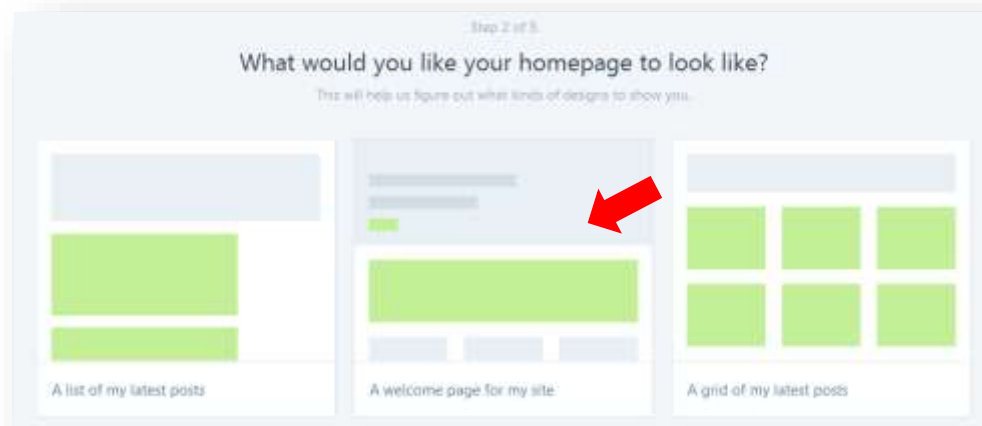

Select a category (**Business & Services**) from the list:

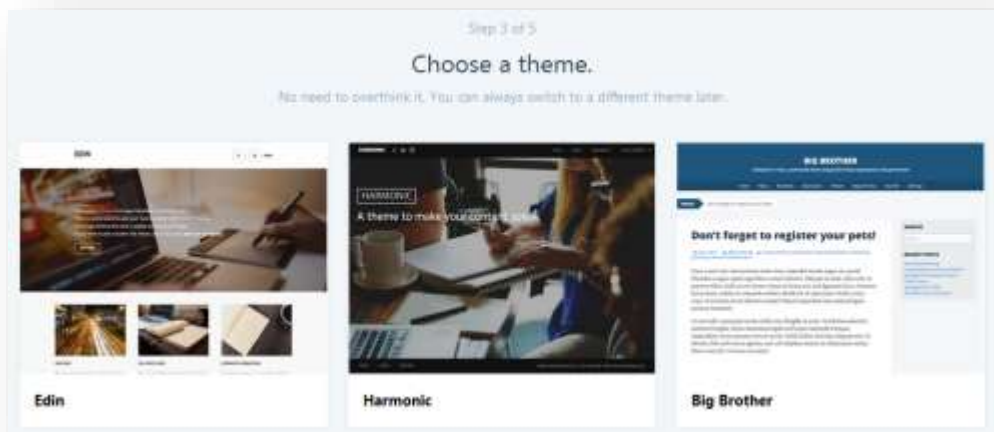

Choose a subcategory (**Restaurants & Locales**):

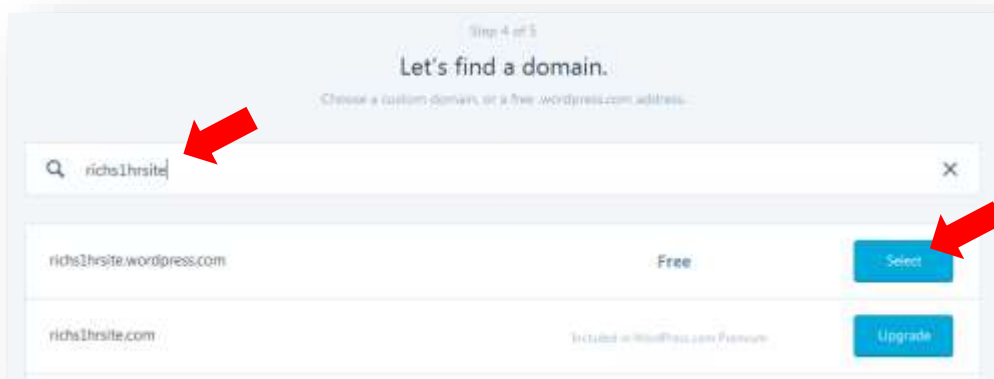

Choose the type of home page (**A welcome page for my site**):

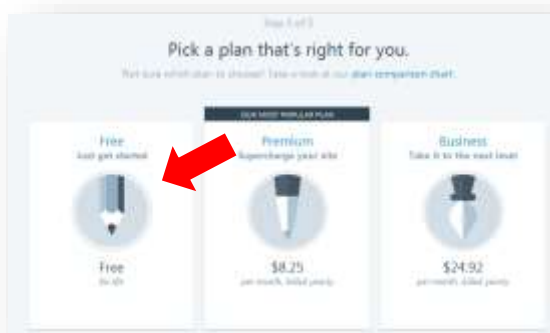

Choose any temporary theme by clicking any one of the choices presented [We will change this later]

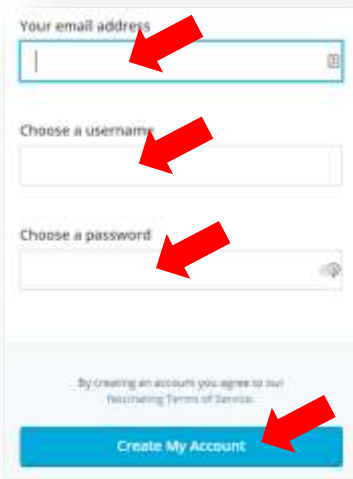

Type a domain such as **Sams1hrsite**, if your first name is Sam. Then click **Select**:

Click the plan labeled “Free”

Type your email address, a username, and a password, and then click the button: [Create My Account](#)

The image shows a screenshot of the WordPress account creation form. It features three input fields: 'Your email address', 'Choose a username', and 'Choose a password'. Below these fields is a checkbox for 'By creating an account you agree to our [Privacy Policy](#) and [Terms of Service](#)'. At the bottom is a blue button labeled 'Create My Account'. Four red arrows point to the email field, the username field, the password field, and the 'Create My Account' button.

Verify your email address:

Go to your email website and open the email message from WordPress

Click the button: [Confirm Email Address](#)

Go back to the WordPress site

Your account is now active

[End]
